LANDSCAPING & FORESTRY

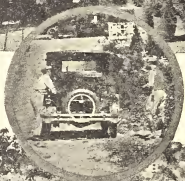

Look for this gay little sign at Pleasant Street Framingham Centre

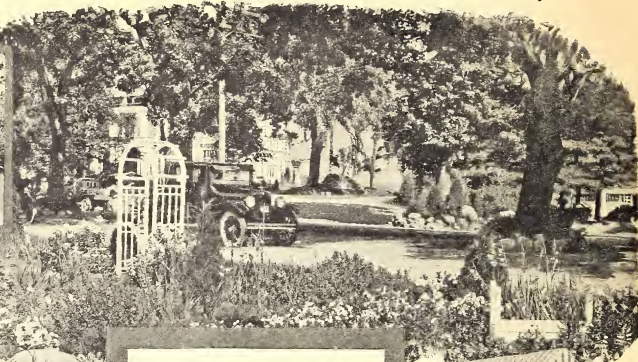

The big mansion in white and green speaks a friendly welcome. Below is the little Wayside Shop, and a group of potted evergreens

Picked, packed and delivered

Broad drives and enticing paths through gardens bright with flowers invite you

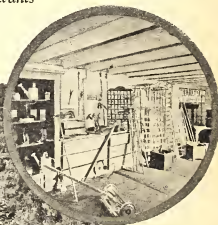

YOU are cordially invited to Little Tree Farms. Walk through our large Demonstration Gardens and Sample Beds. We know of none finer. Take a look through the offices and packing houses or stroll around the grounds. You will find much to delight you, to arouse your interest.

So don't fear to ask questions, they will be answered ungrudgingly. An hour at the Farms has often crystallized a plan, solved a problem, created new ideas, saved time and money later.

Again, we say "Welcome to Little Tree Farms!"

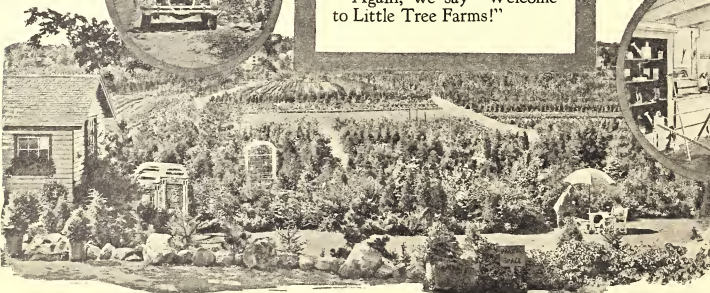

Courteous salesmen are always "on deck" to answer questions and satisfy your wants

A corner in the Supply Shop. Full descriptions of tools on pages 63 & 64

A partial view of the Demonstration Gardens and Sample Beds with growing fields in the distance

This historic old mansion of the last century, once again restored to its oldtime glory, is now alive from dawn to dark with happy industry, for it houses the executive offices of Little Tree Farms

FOR those of you who may not be able to visit Little Tree Farms in person, we have sprinkled these and the following three pages with random glimpses of the resources, organization and activities of Little Tree Farms. These are only hints of the many ways in which we may serve you.

"A Little Journey" through these pages will, we feel, be a pleasanter and more illuminating introduction to this Year Book and so to Little Tree Farms than many pages of printed description.

Farther on you will find many pleasant suggestions with illustrations for the adornment of your home grounds and plant offers to complete them.

*Plenty of space, fresh country air and sunshine make the offices a cheerful place in which to work.
A Rest Room is provided for the many young women whose typewriters click off and file your orders*

On this curious machine your order is neatly typed quintuple, all in one operation

Motor truck delivery for easy, quick and cheap transportation

*At right—

shipment*

*Below—
express
delivery*

No pressure of a busy season is allowed to interfere with careful packing, exactly suited to the mode of transportation. Barring unforeseen accidents, your freshly-dug plants will reach you in good condition

A corner of the drafting room. From rough sketches and surveys made in the field these young men are developing on paper the planting plans of the Landscape Engineer and owner.

The plans guide the crew just as a house plan helps a builder

The survey, the plans and then the planting crew

Landscape plans may seem formidable to the layman, but a conference with a Landscape Engineer illuminates the most intricate plan and generally ends in approval

HERE is a glimpse of the Landscape Department and some of its activities.

This highly organized and efficient department is one solely of service. Its personnel, composed of trained and experienced Landscape Engineers, will, on request, consult with you, develop on paper your own ideas or suggest a plan to you for any type of planting you may have in mind. This applies to a simple planting around the house foundation or the landscaping of a large estate. They will furnish estimates for the plants or other materials that may be necessary, and if you so desire, will furnish and superintend the labor to bring the plan to completion.

Walls of masonry and brick, no less than wood, require the pleasant relief of green leaf and blossoming twig

A few "Before and Afters"

The views on this page suggest some of the many ways our Landscape Department can serve you. It will grade and seed your lawns or renew your old ones; design and build your driveways, paths or sidewalks; plan, construct and plant for you flower gardens, rose gardens, rock gardens, water gardens and pleasure houses

When you plan your new home, start right. Get one of our Landscape Engineers into the conference with your architect. A house shifted a few feet on the plans may make a vast difference in the home picture

THE overhead costs of this department are largely absorbed in the overhead of the business, and this makes it possible to keep its charges down to a minimum. In fact they are a negligible factor compared to the value of the services rendered.

We cannot too strongly recommend to prospective builders, architects and home owners planning considerable changes in the landscaping of their grounds, that they get in touch by person or letter with our Landscape Department.

Just as certain house plans are suited to one site and not to another and adequately or not reflect the characteristics and tastes of the owner, so the individuality and beauty of the home environment can be made or destroyed by the landscaping around the house.

Below and in the circle are glimpses of our jobs

Untidy now—wait till they are through!

A picture painted with green grass, trees and shrubbery, sunshine and flowers, is never finished. In the late Fall and early Winter is the best time to plan changes with our Landscape Men. Then,

too, our Service Department can mulch flower beds, protect tender shrubs with straw, remove dead limbs from trees and brace weak ones against winter storms. It can fill a cavity in a tree and prolong its life

NOT only will our Landscape Department design and plant your grounds, but our Service Department will look after them if you so desire. This includes such services as the care of lawns and gardens, the proper pruning and trimming of shrubbery, and the care and repair of individual trees.

Our Forestry Department is equipped to plant and look after private and commercial tracts of woodland, large or small.

Refer to pages 27 to 29

The three views directly above indicate the work of our Forestry Department. Left to right—new forest plantings are being made. Center—a “Stand of Pine” has been cleared (dead limbs, trees and underbrush removed)

Here is Little Tree Farms Famous FRIENDSHIP OFFER for 1926

Look at these Plants—
Four specimen Evergreens—big-rooted, full of life and vigor, chosen for shapely beauty and colorful foliage.

This is our great all-purpose collection to plant at your doorstep, path entrance, on the lawn, or where you will.

Our Best "Advertising"

April 14, 1925
Albany, N. Y.

"The \$10.00 collection of little trees reached us safely and in perfect condition. They are already planted and give us daily pleasure."

Year after year we have offered a similar value to acquaint the public with Little Tree Farms quality, and add new names to our roll of friends. We know of no greater Evergreen value, our "friendship maker".

These Evergreens, thrice transplanted, freshly dug, balled and burlapped, carefully packed and crated will be shipped immediately on receipt of your order.

DOORWAY AND FOUNDATION PLANTINGS

This and the other pictures on this page give some general ideas of plantings suitable for a

In considering the general exterior adornment of the house, let us assume that the grounds have been graded, the lawns planted, the house itself is in good order and of a style of architecture that is pleasing and suits our tastes. Let us then stand across the street or on the edge of the lawn and study the picture it makes with a frank and critical eye. Something is lacking. The house comes down too abruptly to meet the ground, the corners stick out sharp and obtrusive. The foundation of cement and

modest doorway, and particularly for the use of our "Friendship Offer" shown above

stone broken here and there with cellar windows has an ugly look. The house looks as if it were just "setting there" on top of the ground. It does not "belong".

The answer to all this is shrubbery of some sort. Perennials are lovely, but lack height and permanence. Flowering shrubs are beautiful, effective and inexpensive, but unfortunately lose their foliage in winter. The many varieties of plants we call Evergreens meet the situation exactly and are the popular material for the purpose.

* "B & B" (Balled and Burlapped) means roots in a ball of native loam wrapped and tied in burlap.

Another Charming DOORWAY GROUP

Six Very Desirable Evergreens

Offer A 2

Price \$22.50

1 Arborvitae	4 to 5 feet
1 White Spruce	3 to 4 feet
1 White Fir	2 to 3 feet
1 Ground Juniper	18 to 24 inches
1 Japanese Yew	12 to 18 inches
1 Big Leaf Wintercreeper	4-year

All plants Three Times Transplanted
Balled and Burlapped

A somewhat more elaborate collection than the Offer on page 5, and particularly designed for a simple doorway planting. Plant one of these Offers on each side of your doorway, and you will be more than pleased with the effect. Note the size, vigor and variety of these six plants. A very happy combination.

Our price includes packing

Order by name and number with remittance

Doorway Decoration

The Evergreens look well winter or summer, and their slower growth can be kept in hand more easily by an occasional pruning. What they lack in flowers they make up in variety of leaf coloring and texture, though a few low-growing, flowering shrubs, broad-leaved evergreens and even perennials scattered along the edges are often effectively employed.

This sort of planting along the foundation line of the house is called a Foundation

Planting, and the point where we enter the house, and on which the eye of the approaching visitor naturally focuses, the Doorway, is the most important point in that line and should be considered first,—indeed some sort of planting here is indispensable.

On this and other pages you will find some pictorial suggestions both for the treatment of the doorway alone and in connection with a complete foundation planting. To meet the natural question as to what material should be used, we have

arranged groups of plants in offers at varying prices to simplify the problem for you. You can plant a doorway planting this season, extend it along the foundation line next year, if you choose, and carry it around the corners the year after, so dividing the cost and labor without rebuilding what you have already done.

Thus in a comparatively short time your home will be beautified at a moderate expense and with little effort. At any rate, start this year with a doorway planting if nothing else!

Evergreen Shrub Collection for a Shaded Exposure

Offer A 3

Price \$12.00

FOUR PLANTS

1 Rosebay Rhododendron	2 to 3 feet
2 Mountain Laurel	12 to 18 inches
1 Mountain Andromeda	12 to 18 inches

Four little beauties as you can see! Will grow best in a rich moist soil, partially shaded by the house or other plants from the midsummer sun. They should be arranged as indicated in the photograph at the right.

Our price includes packing

Order by name and number with remittance

Very Special

Two of Offer A 2 and one of Offer A 3,
value \$61.50, for

\$55.00

†The number of "T's" designate the number of times transplanted. See explanation at the bottom of Page 30.

The luxuriant planting of mixed evergreens and evergreen and flowering shrubs effectively screens the side porch of this massive stone house, giving it a fitting air of privacy

A few flowering shrubs add much to the charm of this simple cottage. Offer A 59 on page 49, costing \$9.50, will give a succession of blooms

Larger plants should have been used along this foundation. On the terrace bank is an effective use of Japanese Pachysandra, an evergreen ground cover worth knowing. See page 46

How to Select a Foundation Planting

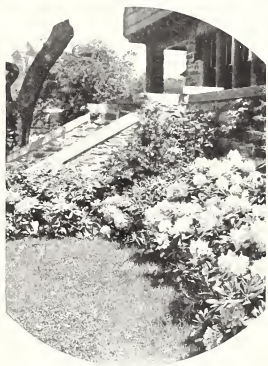

The choice of a foundation planting is dictated by the size and character of a house, its situation, the slopes of the lawn and last but not least the condition of one's purse.

For a summer bungalow a few shrubs may be sufficient. A porch too close to the street may also be screened by a thick planting of flowering shrubs. For a northern exposure or one partially shaded from the sun, Arborvitae and Hemlock combined with evergreen shrubs give satisfaction.

If the house has a high foundation or is tall and narrow, larger plants should be used and extended in wider "wings" at the outside corners; deep bays and juts can be softened by planting in and around them. The taller plants should be used in the background and as accents at the corners and between windows.

Climbing Roses and Perennials add charming touches of color. For prices and descriptions see pages 59, 60, 61

Rhododendrons are beautiful at all times but especially so when in bloom. For prices see pages 46 and 47

This foundation planting by Little Tree Farms is a happy blend of various evergreens artfully arranged to accent the beauty of the house. The material to duplicate the effect will cost about \$200.00

* "B & B" (Balled and Burlapped) means roots in a ball of native loam wrapped and tied in burlap.

Offer A 4 Price \$11.00 CORNER GROUP

THE OFFERS made on these and the preceding pages are arranged for you solely as suggestions to help you and not in any way to limit your choice. Two or three offers may often be combined advantageously. For example, you may combine the two offers on this page, or either one of them with any of the units on page 8.

Thus, in these offers there are over fifty combinations of plants you can make without sacrificing the price advantage you gain in buying them in special offers. Furthermore, many other attractive plant-

What a difference a few plants make

varieties at catalog prices may be added to any offer from the regular catalog beginning on page 31. Such additional Evergreens, Evergreen and Flowering Shrubs, or Perennials of various colors will make your planting even more charming.

If you are in doubt as to how to arrange the plants, send a snapshot of your home and front dimensions to our Landscape Department for a planting plan to suit your needs. Or if you do not care to undertake the actual planting yourself, this department will do the work for you.

—or this Glorious Collection (24 plants, 9 varieties) for the entire house front

2 Deutzia Pride of Rochester 4 to 5 ft.			2 Peegee Hydrangea 2 to 3 ft.	
Our price includes packing			All are very best quality	Order by name and number with remittance

Just as a foundation planting dignifies the appearance of the home and the approach to it, so many other types of buildings can often be beautified by the same treatment. Churches, banks, libraries, courthouses, town halls and other public buildings and monuments look better and give a more prosperous air to the communities they serve if they have plantings around them.

Even the view of the county jail or poorhouse may be made more pleasant to the passerby and perhaps to the inmates by attention to their surroundings.

A gracious planting of L. T. F. evergreens that extends this Church's welcome to its parishioners and the "stranger within the gates"

This illustrates the Evergreen

Group in Offer A 14 below

An "Odd Corner"

This is a judiciously chosen group of harmoniously contrasting evergreens that is just the thing to plant in some odd corner such as a deep inset or around a jutting corner of the house line. Perhaps in a spot in an old planting that looks a bit "thin" and threadbare. Or better still perhaps to combine with and give more variety to any of the offers on the last two pages. One of these offers, by the way, would make a very attractive single planting for a doorway a bit "off center" of the house front.

Offer A 14 Price \$30.00 GROUP OF 7 EVERGREENS

These plants are all three times transplanted and B & B stock.

1 Juniper	4 to 5 feet
2 Arborvitae	3 to 4 feet
2 Sawara Cypress	18 to 24 inches
1 Blue Colorado Spruce	2 to 3 feet

Our price includes packing.

Order by name and number with remittance

*"B & B" (Balled and Burlapped) means roots in a ball of native loam wrapped and tied in burlap

This low-spreading hedge of Japanese Barberry suits this site admirably. \$10.50 would plant 30 feet

HEDGES AND BORDERS

Order by name and number with remittance

A hedge is a hedge, just as "pigs are pigs" to some people, but actually there is a wide choice of types. Japanese Barberry makes a close impenetrable lacework of thorny branches curving gracefully at the tips and adorned with a multitude of tiny leaves, with sprays of red berries in the fall that last all winter. It shears almost as well as California Privet for a formal effect, but is better allowed to grow naturally.

California Privet is the most popular hedge at present and it shears beautifully.

Note: For the single row set plants 12 inches apart (See Fig. A). For double row set plants same distance apart, about 9 inches between rows in staggered row (See Fig. B)

Note: No orders for hedge offers accepted for less than 25 running feet. For smaller quantities see pages 31 through 51.

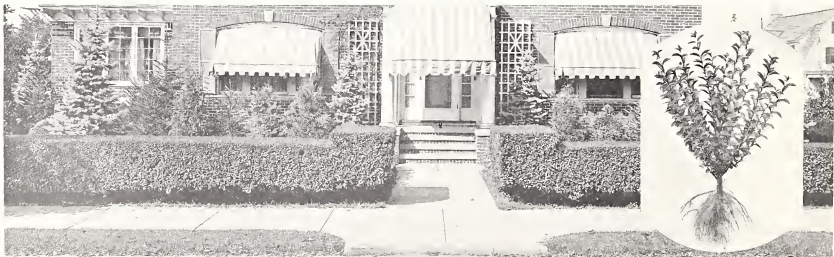

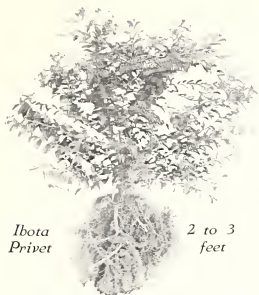

Fig. A

Close-clipped hedge of California Privet. Plant Offer A 16 in double row, costing \$9.00 for 30-foot section

Fig. B

*Ibotia
Privet*

2 to 3
feet

The Ibotia, Amur and Regal Privet are more unusual and even more attractive as hedges. Other desirable hedge materials are illustrated on this page and included in the offers below.

Big Leaf Wintercreeper makes a handsome and unusual hedge. See Offer A 29

*"B & B" (Balled and Burlapped) means roots in a ball of native loam wrapped and tied in burlap.

A Little Tree Farms border planting that divides a lawn from a vacant lot. Note the deep "bays" that add much to the artistic effect. This border was designed, furnished and planted for less than \$500.00

If You Have the Space—Plant a Border!

Bright colored perennials against a background of shrubs and evergreens form a border for this walk. Offers A31 and A32 on the next page will help

Borders serve much the same purpose as hedges—to mark edges or boundaries—but whereas a hedge is composed of only one kind of plant, many varieties may be introduced into a border. They thus serve the double purpose of hedge and garden and consequently are a more naturalistic and artistic type of landscaping than the simple hedgerow.

There are many sorts to choose from. At the top of the page is a mixed evergreen border on the edge of a lawn. At the left a perennial border marks a pathway. At the right a border of evergreens and evergreen shrubs banks the sides of a city yard.

On the following pages are Offers to assist your selection,—or we will plan a border to meet your needs. An elaborate border planting represents a somewhat advanced type of landscape design which you may hesitate to undertake without expert advice.

A city back yard such as this gets little sun. Plant a mixed border of evergreens and evergreen shrubs. See Offers A30 and A31 on page 17

The evergreen border forms both a background for the lawn and a screen for the kitchen garden. Consult our Landscape Department as to plans

It is here our Landscape Department can help you. Look over the illustrations on this and the following pages. Is there anything that suggests what you would like to see around your own home? Tell us what type of planting you prefer and the length of border you require. Our Landscape Engineers will then draw up a rough sketch of the proposed border and submit it to you.

If you live nearby a personal interview can be arranged; more detailed plans can be made; estimates on the cost of the plants and planting can be arrived at, and the whole matter attended to easily and without trouble to you. All this is at a very moderate charge as we maintain this service solely to assist you and not as a profit-making enterprise.

An extensive border planting charmingly "mixed" in composition and irregular in outline. A blend of evergreens, flowering shrubs and perennials—a pretty complete garden in itself

EVERGREENS

For a 50-foot Border

Offer A 30 Price \$74.00
THREE TIMES TRANSPLANTED "B & B"

2 Pines	4 to 5 feet
1 White Spruce	4 to 5 feet
2 Douglas Fir	3 to 4 feet
2 American Arborvitae	3 to 4 feet
2 Colorado Spruce	3 to 4 feet
1 Austrian Pine	3 to 4 feet
1 Pfitzers Juniper	2 to 3 feet
1 Globe Arborvitae	18 to 24 inches
1 Tom Thumb Arborvitae	18 to 24 inches
2 Ground Juniper	18 to 24 inches
1 Japanese Yew	18 to 24 inches

This special offer of 16 three times transplanted (1st grade) evergreens for only \$74.00 has been designed to make a 50-ft. unit of an evergreen border. This collection will produce, on a smaller scale, an effect similar to the planting at the top of the preceding page. Notice in the diagram of the evergreen border below how the various trees are arranged, not in straight lines but staggered to produce interesting "bays."

Our price includes packing.

THE WINTER GARDEN

A Charming Novelty in Gardens to Grace the Winter Landscape

Attractive at all times of the year, this garden, composed exclusively of evergreens, finds its chief beauty in Winter when other garden delights have for the time faded from view. On mild winter days it forms a delightful *plaisance* in which to stroll and take your ease.

Almost any variety of evergreens can be introduced—the more the better! As a start we suggest the short list at the right and if you will send the garden dimensions our Landscape Department will tell you what to plant.

THE WINTER GARDEN

(for descriptions see pages 31 through 45)

EVERGREENS

White Fir
Douglas Fir
White Spruce
Colorado Spruce
Blue Colorado Spruce
Engelmann Spruce

Red Cedar
Irish Juniper
American Arborvitæ
Siberian Arborvitæ
Golden Arborvitæ
Canada Hemlock

EVERGREEN SHRUBS

Mountain Laurel
Drooping Leucothoe
Mountain Andromeda

Carolina Rhododendron
Catawba Rhododendron
Rosebay Rhododendron

Evergreens in the Garden

You can also use Evergreens as "Accents" in your Flower Garden

The exquisite formal gardens below well illustrate the use of evergreens. Tall Junipers and stately Arborvitæ to accent the corners, low hedges of Hemlock, baby Spruce or Wintercreeper to outline the paths and beds. Here and there a glistening Blue Spruce or silvery White

Fir to add variety, perchance, and the whole garden fittingly cloistered and confined within high walls of sheared Arborvitæ or Hemlock,—a perfect foil for the delicate beauty of flowers. The varieties listed below should have an annual shearing to keep them trim-looking.

Suggested List of Evergreens for Use in the Garden For Use as Accents

Red Cedar
Irish Juniper
American Arborvitæ
Golden Arborvitæ

For Bordering Flower Beds

Douglas Fir
White Spruce
Colorado Spruce
White Fir

For Garden Hedges

Japanese Yew
Hemlock
Big Leaf Wintercreeper

Note: GARDEN FURNITURE forms a necessary adjunct to the garden as an outdoor living room. Charming designs in benches, arches, sundials, bird baths, etc. on pages 63 and 64, or built to order to fit any given situation.

We have also a varied line of garden tools, pots, tubs and window boxes made of both wood and stone; lawn sprinklers, sprayers, insecticides, fungicides and plant foods.

Here is a garden of "Baby" evergreens. Many of these are ready to be used in any decorative scheme

Offer A 38 Price \$41.00 BABY EVERGREEN GARDEN

TWICE TRANSPLANTED

10 Scotch Pine	12 to 18 inches
10 Norway Spruce	12 to 18 inches
10 Colorado Spruce	12 to 18 inches
10 White Spruce	6 to 8 inches

ONCE TRANSPLANTED

10 White Fir	8 to 12 inches
10 Red Pine	6 to 8 inches
10 Red Cedar	6 to 8 inches
10 American Arborvitae	4 to 6 inches
10 Balsam Fir	4 to 6 inches
10 Douglas Fir	4 to 6 inches

SEEDLINGS

10 Canada Hemlock	9 to 12 inches
10 Ground Juniper	6 to 8 inches

Why not grow your own Evergreens in a garden of "Baby Evergreens." Start your plants from the "ground up." These choice evergreens will in a few years become sturdy, handsome trees fit for any lawn. Please remember, however, these are young and need to be planted in well-worked garden loam and cared for as you would cultivate your vegetables.

Our price includes packing.

Offer A 39

FLOWER GARDENS FOR EVERYONE

Prices Below

The best flower gardens that time, thought and plant materials can produce! No longer is it necessary for you to worry, "How shall I make a garden properly designed to produce an artistic effect." All your troubles are over, the special offer gardens listed below will solve your problem.

DESIGN A 60 ft. x 60 ft. **PRICE \$245.00**
722 Assorted Perennials, 36 Peonies, 61 Phlox, 32 Chrysanthemums, 24 Iris

Hedge extra 220 running feet required

* "B & B" (Balled and Burlapped) means roots in a ball of native loam wrapped and tied in burlap.

From a single plant or two to modestly indicate a path entrance to an elaborate landscape motive about the gateway of a large estate may seem a far cry, but

the basic principle is the same—to erect a monument or mark in living green at the turn and so guide the visitor within.

Little Tree Farms
will do this
for you

Dignify Your Path and Drive Entrances

with These Splendid Evergreen Collections

To mask the path or drive entrance to one's home the formal note is in order. A very simple but at the same time attractive effect can be produced by planting a pair of the group offered below, one on each side of your path entrance. These are carefully selected plants that will look "just right" in a season or two. (See illustration at the right.)

Even more desirable is the group shown and offered below as a Drive Entrance Group. All the plants are three times transplanted and *B & B stock, which means the very best, and taken together are a perfect combination for the purpose. In fact, this collection was so popular last year we are offering it again. (See illustration at bottom of page.)

Offer A 40

Path Entrance Group

4 Plants \$12.00

All are three times transplanted and *B & B stock.

- 1 White Spruce 2 to 3 feet
- 1 Tom Thumb Arborvitae 18 to 24 inches
- 1 Hemlock 18 to 24 inches
- 1 Ground Juniper 18 to 24 inches

Our price includes packing

* For descriptions and additional sizes, refer to the above pages.

Stately Junipers and flowering evergreen shrubs line this driveway with their gracious beauty of form and color

These White Pines planted a generation ago will still delight the wayfarer generations hence

Our Colorado Spruces 5 to 6 feet tall will start a drive like this. Time will soon do the rest

A graceful planting of mixed Evergreens and Hardwoods. We can supply many varieties

* "B & B" (Balled and Burlapped) means roots in a ball of native loam wrapped and tied in burlap.

White Pines form an effective screen and background for a tennis court

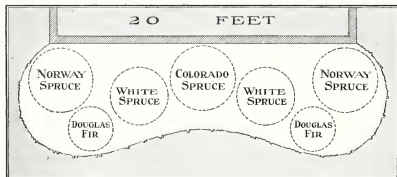

A corner screen that in a few years will effectively block out the neighboring garage

Decorative SCREENS of Living Beauty

Little Tree Farms White Pines screen this garage, built too close to the house

The high base of this house is relieved by the broad sweep of evergreens along the drive

To Harmonize or Conceal Garages, Service Yards, Neighboring Premises or Objectionable Views

The purpose of all screen planting is properly utilitarian since its main function is to screen off or disguise that which you do not wish to see, and as it must perform that service continuously it should be composed mainly of evergreens, since they do not lose their foliage in Winter.

On this page screens of various types are illustrated and two offers made to give you an idea of costs. If not suited to your needs, consult our Landscape Service.

Offer A 42 A GARAGE SCREEN for \$29.00 (See planting plan at left)

2 Norway Spruce 4 to 4 feet 2 White Spruce 2 to 3 feet
1 Colorado Spruce 3 to 4 feet 2 Douglas Fir 2 to 3 feet
All three times transplanted and "B & B (first grade) stock.

Offer A 43 SERVICE YARD SCREEN for \$45.00 (See illustration below)

6 Arborvitae three times transplanted and "B & B stock 5 to 6 feet
Our prices include packing. Order by name and number with remittance

These Arborvitae soften the uncompromising lines of the service yard trellis

This windbreak of Spruces can be duplicated in twenty years with Little Tree Farms stock. First cost is last

Rugged WIND AND SNOW BREAKS for Protection

**Protect Your Home, Barns, Cattle and Fields
with These Stout Bastions Against
the Winter's Blasts**

WINDBREAKS are fundamentally gigantic hedges and like hedges we sell them by the running foot (R.F.) in single row planting. The larger sizes are in the main most economical, and for New England we especially recommend our 10 to 12 foot White Pines.

EVERGREEN WINDBREAKS IN TEN SIZES

ALL THREE TIMES TRANSPLANTED AND "B & B" (1st grade) STOCK

Offer A 44 (a)	White Pine	10 to 12 feet tall	\$1.25 per R. F.
Offer A 44 (b)	White Pine	9 to 10 feet tall	1.13 per R. F.
Offer A 44 (c)	White Pine	8 to 9 feet tall	1.00 per R. F.

Packing at cost is charged on above three offers

Offer A 44 (d)	White Spruce	4 to 5 feet tall	.63 per R. F.
Offer A 44 (e)	White Spruce	3 to 4 feet tall	.50 per R. F.
Offer A 44 (f)	White Spruce	2 to 3 feet tall	.38 per R. F.

(Set plants 8 feet apart, single row)

Offer A 44 (g)	Arborvitae	6 to 7 feet tall	1.90 per R. F.
Offer A 44 (h)	Arborvitae	5 to 6 feet tall	1.50 per R. F.
Offer A 44 (i)	Arborvitae	4 to 5 feet tall	1.10 per R. F.
Offer A 44 (j)	Arborvitae	3 to 4 feet tall	.80 per R. F.

(Set plants 5 feet apart, single row)

Order by name and number with remittance

A sure defense against sharp drying winds is provided for the gardens below by these Pines and Arborvitae

This is a Little Tree Farm screen and windbreak of White Pine shown just planted and ten years after planting

"B & B" (Balled and Burlapped) means roots in a ball of native loam wrapped and tied in burlap.

Scotch, Austrian or Red Pines will hold their own against driving spray and salt sea wind

Hemlock for underplanting. It thrives in the shade of larger trees

Little Tree Farms solved this steep bank and terrace problem

Our White Pines protect this sliding bank from the encroaching river, adding beauty to the landscape

Taxus, Hemlock, Rhododendron, Euonymus and Douglas Fir make possible this pretty planting

Plants For Difficult Places

In Shade plant: White Spruce, Arborvitae, White Pine, Austrian Pine, Rosebay Rhododendron, Mountain Laurel, Pachysandra, Wintercreeper, Azalea, Flowering Dogwood, and Hemlock.

Exposure to wind, cold and ice requires Spruces and Firs, Red, Scotch and Austrian Pines.

For Barren Soil and steep banks: Red, White, Austrian and Scotch Pines; Douglas and White Firs; Red Cedar; Ground Juniper; American Arborvitae; Norway, Sugar and Silver Maples; White Ash and Red Oak.

For Wet Places: Balsam Fir, Arborvitae, Hemlock, Red Maple, Swamp Oak, Flowering Dogwood, Viburnum and Mountain Laurel.

For Dry Places: White, Red, Scotch and Limber Pines; Blue Spruce; Junipers; White and Douglas Firs; Silver Maple; White Ash; Japanese Barberry and Privet.

See index inside rear cover for descriptions

Giant Rhododendrons and Laurel fittingly border this shaded roadway

For shady place ground cover nothing can excel Japanese Pachysandra

This young forest of Douglas Fir blends gracefully with the old, creating new value and beauty for the land owner

Forest Plantings for LAND IMPROVEMENT

Plant Trees on Idle Land and Reap Dividends of Pleasure and Profit

RICH dividends of pleasure and profit may be gained by planting idle land to trees. Land unsuited to surface crops will generally support without difficulty the deep rooted trees of a forest.

As a purely commercial proposition, the increasing cost of timber makes an investment of this sort a surer and more profitable one than money at compound interest in a bank. Should you have an eye to the future development of your land into residential property, the trees may be planted farther apart to allow their full development and then you have a park through which private driveways may be built and land divided into small estates or building lots.

From the aesthetic standpoint, mass plantings of this sort are distinctly worth while.

Forest plantings may be artistic—note this forest border of Juniper and Flowering Evergreens

The beauty of shore frontage can be greatly improved by woods through which vistas may be left if desired. Whether you call it a pleasure grove or wood lot, a grove of trees adds to your pleasure as well as to the value of your property. One of the chief beauties of old English estates is the large parks that surround the manor houses and insure their privacy.

For nearly two decades Little Tree Farms has made Forest Plantings for Land Improvement a specialty. We have planned and planted for every purpose, under all conditions: reservoir margins, public and private parks, bare portions of large estates, windy hillsides, dry sandy flats, wet cold "draws".

The cost of such improvements is small compared to the results to be gained. First cost is the last!

A woodland planting of blended Spruces adds much to the quaint beauty of this inland waterway

* "B & B" (Balled and Burlapped) means roots in a ball of native loam wrapped and tied in burlap.

This group represents three stages of a forest

planting from the bare hillside to valuable timberland

Department of**

FORESTRY SERVICE

A grove of hardwoods. A pleasant retreat for you and your family. See Red Oak Grove Offer

WHETHER you are interested in the planting of a small grove or the forestation of square miles of vacant land, whether acting as spokesman for yourself only or as a representative of large corporate or public interests, you will make no mistake in consulting our Forestry Service.

No private organization has more experience, better resources to provide the material, better facilities for executing a forest planting than Little Tree Farms. At the head of this department are trained forest engineers to superintend all work; in our nurseries are millions of suitable plants from which to draw.

On request, we will make a survey and submit estimates either for the plants alone or on the basis of doing the whole job, furnishing plans, plants, material, tools and our own crews or superintending local labor as seems wisest.

Write, call or telephone,—we are at your service.

An eighteen year old forest of planted Red Pine. Note splendid straight trunks

Soil erosion around lakes, streams and reservoirs can be prevented by planting White Pine such as this

† The number of "T's" designate the number of times transplanted. See explanation at the bottom of Page 30.

Please Note:—These are not for specimens or decorative groups, but for profitable planting in quantity. For decorative uses, see prices of three times transplanted stock in all the pages following.

We sell 500 or more trees of the same size and kind at the thousand rate; between 50 and 500 at the hundred rate.

Our prices include careful packing except where noted.

* For descriptions and additional prices see pages 31 to 45, and also pages 52 to 57.

Note: None of these plants are "culls," "seconds" or "discards." All are prime quality stock in the grades represented, hardy, vigorous, quick growing, raised for this purpose only and not for ornamental use—hence the low price

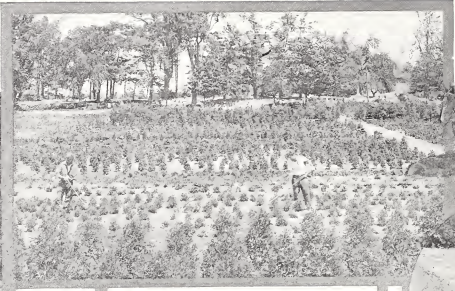

Our Scotch Pines—millions of them—ready to reforest a hillside

* "B & B" (Balled and Burlapped) means roots in a ball of native loam wrapped and tied in burlap.

"The Man with the Hoe" is always a big factor at Little Tree Farms

Tom and Jerry—full of oats and ginger! It's always "Be-kind-to-animals Week" at Little Tree Farms

Putting the "babies" to bed

THERE is no better stock than Little Tree Farms Stock.

Hardy northern grown seed, collected and selected with great care, Old World ideals of patient and intensive cultivation combined with New World ideas of economical management and large scale production make possible stock of the highest quality at prices that fear no competition. This holds good—size for size—grade for grade—whether you buy one plant or a thousand.

"Our Gang" weeding the rows

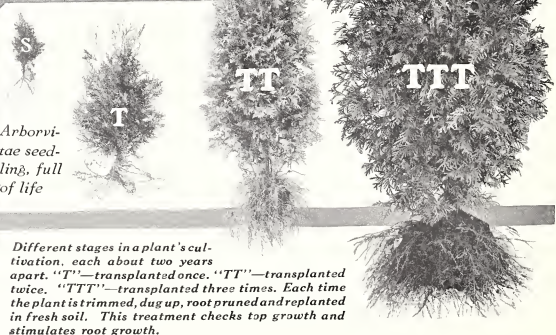

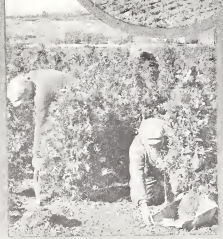

Potting Perennial plants

One at a time, 4 in. apart, 9 in. between rows

In with one load and out for another and maybe Gusto isn't proud of 'em

Arborvitae seedling, full of life

Digging for shipment. See the big ball of fibrous roots and rich soil on the four-foot Arborvitae being burlapped in the foreground. No wonder they grow

Different stages in a plant's cultivation, each about two years apart. "T"—transplanted once. "TT"—transplanted twice. "TTT"—transplanted three times. Each time the plant is trimmed, dug up, root pruned and replanted in fresh soil. This treatment checks top growth and stimulates root growth.

EVERGREENS are the greatest factor in successful planting of home grounds. They combine in the highest degree, Beauty, Adaptability and Endurance. Shade and spicy aroma surround them in

Summer's heat; warmth and beauty in Winter's cold. And in storms of snow and ice they wrap themselves in mantles of incredible and gleaming purity, lending an air of quiet dignity to the home.

THE FIRS

THE Firs (*Abies*) are among the hardest and most effective evergreens. They supply the elements of grace and luxuriant softness in a landscape planting, together with symmetry of structure and varied color tone. They well supplement the Spruces, which they closely resemble in outline, but which differ from them in habit of growth. The very best of the firs for ornamental and protective planting are here offered. It pays to buy the best.

Abies Concolor

WHITE FIR

The White Fir (often called Silver Fir), pictured above at the left, is especially notable for its lovely glaucous needles, its perfect form and graceful, erect habit of growth. As it is splendidly healthy and vigorous, it has long been a favorite with our customers for planting alone or in the

For a glorious ornament to your lawn, alone as a specimen, or in a group, plant this perfect Little Tree Farms White Fir 4 to 5 feet tall at - \$10.00

foreground of groups. Our White Firs in the 3 to 4 foot grade are perfect as lawn specimens.

Little Tree Farms White Firs are all grown from the seed of Colorado trees, and are absolutely hardy; they can be planted successfully, even in shady, wet or exposed places. Use the "TTT" plants for all ornamental purposes, and the "T" grades alone or in combination with Douglas Fir, White Spruce and White Pine for field or woods planting.

"*Couldn't do better myself*"

Topeka, Kansas
April 20, 1925.

"I was very much pleased with the merchandise as everything was far better than I expected; you know, a fellow expects to get the worst of it in ordering, more so than if he were there and saw the things himself, but I don't believe that I would have done any better if I had been there myself."

*"B & B" (Balled and Burlapped) means roots in a ball of native loam wrapped and tied in burlap.

DOUGLAS FIR

The glorious Douglas Fir, pictured in full growth. Use our 3 to 4 foot size

Pseudotsuga Douglasii DOUGLAS FIR

The beauty of Douglas Fir as a single lawn specimen or in the foreground of a group is obvious from the pictures. Its soft, pointed needles are closely "woven" together to form an almost impenetrable mass of green against the skyline.

The utility of Douglas Fir is amply proven by its adaptability to varying soil and climatic conditions from the Atlantic

The "half-grown" Douglas Fir with its countless "tips" of spring growth

to the Pacific. It is equally desirable as a lawn specimen and for large plantings, either ornamental or utilitarian; one of the most sought and valuable of all evergreens.

The Douglas Fir is a Fir only by resemblance. It is really a genus apart; complete. It has endured through uncounted ages and thrives today endowed with the vast vitality and adaptability which enabled it so to survive.

Just one block of our "TTT" Douglas Firs, each as sturdy as the sample at the right. You may safely use these Douglas Firs about even a small home. Give them a regular annual shearing

*Douglas Fir at only
3 to 4 ft. \$5.00 each*

* The number of "T's" designate the number of times transplanted. See explanation at the bottom of Page 30.

Douglas Fir—Continued

It bears sharpest cold, harshest wind, poorest soil; it can thrive in partial shade or in full sunlight, and flourishes under shearing. In short, the Douglas Fir is superbly adapted for ornament, for protection and for practical uses.

For all extensive plantings, such as the continuous groups along your drive or the edge of your lawns; for planting at the edges of and under tall woods; and for plantings to break the wind or shut out unattractive views, Little Tree Farms "TTT" Douglas Firs give the maximum of service, beauty and economy. The strong plants of this grade will recover their cost by giving earlier results.

For large areas, underplantings, or for reforestation, we furnish seedlings and transplants in good quality at very low prices.

Prices on page 29.

These are the three "magnificent" Firs offered above for only \$12.00. They are splendid plants for decorating the lawn

A perfect use for Junipers. Plant our 6 to 8 foot Red Cedars for similar effect

THE Junipers hold a unique place in our landscape art, furnishing for this country the exquisite outline which the classic Cypress and the ancient Cedars gave to the gardens of the Old World. There is no substitute for the Junipers—tall, prostrate and semi-prostrate, in gardens, by the roadside or around the home.

Juniperus Communis

GROUND JUNIPER

Ground Juniper, or Prostrate Juniper, is one of the handsomest edging plants of all, and is charming also as a specimen plant. It varies from a prostrate form to a rather erect plant, with dense, green foliage. In autumn it is covered with berries of a beautiful frosty blue color which attract the winter birds.

Use Little Tree Farms Ground Juniper in the 18 to 24 in. size (see illustrations and special offer on opposite page) at entrances, in foundation plantings and for edging paths and beds. Grown from the seed of well-established New England plants, our Ground Junipers are extremely hardy.

A perfect White Spruce as a lawn specimen

Perfect White Spruces three times transplanted at Little Tree Farms

Seed cones of the mature spruce

THE Spruces (*Picea*) provide many delicate and striking variations of green tone, and interesting differences in branch and foliage, while all maintain the powerful pyramidal structure of their race.

Little Tree Farms Spruces are grown for vigor of root and top, for symmetry and clear color. They are widely sought for choicest decorative use, for protective groups and for large field plantings.

THE SPRUCES

Picea Canadensis WHITE SPRUCE

White Spruce, first in the list, is first in the estimation of many tree-lovers, for it combines great health and wide usefulness with undoubted beauty and distinction. Like the Douglas Fir, it makes nothing of hard living conditions and keeps its stately appearance whether standing alone, on the lawn, or growing in forest profusion. Its shape is perfect: broad at the base, branches often to the ground, rising to a full majestic pyramid.

Blue Spruce

White Fir

White Spruce

Its color is silvery green, approaching the sheen of the Colorado Spruce. Its branch structure is very close, impenetrable. A noble and beautiful tree for foreground or background.

Little Tree Farms has long been known as the headquarters for superb White Spruces from the smallest seedlings to the larger lawn specimens. The 2 to 3 foot and the 3 to 4 foot sizes pictured above are ready to plant on your lawn singly and in unmixed or blended groups. They are perfect for drive or path entrance; for a garage or garden screen; for a border at the edge of your lawn.

For large areas, underplantings, or reforestation, Little Tree Farms seedlings and transplants give the maximum of service, beauty and economy; they are big-rooted, hardy, "full-of-life" plants sure to grow rapidly into valuable timber.

Offer A 47

Price \$19.00

Picea Excelsa

NORWAY SPRUCE

Norway Spruce is a sturdy, handsome evergreen that grows very rapidly. For this reason it is used extensively in windbreak plantings or as a quickly growing timber crop, as well as for purely decorative purposes. Its foliage is branched to the ground with dense, very dark green needles. When mature its branches droop gracefully to the ground, the lower branches sometimes lying on the ground.

For valuable commercial plantings and future Christmas trees, use Little Tree Farms "TT" stock priced below. Notice the beds of Spruces in the picture below. There are literally thousands of "little trees" all artificially watered when necessary, and carefully hand-weeded to insure sturdy growth. Our "TT" Norway Spruce are grown from Northern seed, big-rooted, sure to grow. After your Spruces become established the annual growth should average over two feet.

The storms of winter emphasize even more clearly the inherent beauty of both the Colorado and the Blue Colorado Spruces

Picea Pungens COLORADO SPRUCE

The Colorado Spruce has always been a feature at Little Tree Farms. All our plants of this species are grown from the seed of hardy trees of the high, cold regions of the Rocky Mountains—its native home. The color is perfection, ranging from a dark green to lighter more silvery tones. This is a regular "he-man's" tree, rugged in growth and bold in outline.

We cannot too highly recommend the three times transplanted Colorado Spruce for all ornamental plantings, single and grouped. They are also beautiful as potted or tubbed specimens. (See illustration and prices above.)

The magnificent health, vigor and endurance of the Colorado Spruce fit it absolutely for aesthetic forest plantings and naturalistic groups. For these large plantings Little Tree Farms has a good supply of strong transplants and seedlings.

Picea Pungens Glauca BLUE COLORADO SPRUCE

Blue Colorado Spruce is the bluest variant of the Colorado Spruce—the tree you mean when you ask for a "Blue" Spruce. The fine specimens priced on the opposite page have a beautiful silvery blue color. It is said that Little Tree Farms has the largest and finest collection of "Blue" Spruces in the country.

These Blue Colorado Spruces are without a peer for use in ornamental pots, at doorways, in gardens as accents, and as lawn specimens. Little Tree Farms annually supplies thousands of these Spruces to customers who want the best.

Plant your "Blue" Spruce in dark, rich garden loam to procure and maintain the deepest blue color. It will be a constant joy in your garden.

The "Four Glorious Spruces" in Offer 48 should rightly be called "Silvery" Spruces for they vary in color tone from the slight silvery color of the Colorado Spruce to the

† The number of "T's" designate the number of times transplanted. See explanation at the bottom of Page 30.

BLUE COLORADO SPRUCE

Just as in the case of the Colorado Spruce so with the "Blue"—we have a number of "extra selected" specimens for pots and vases. A pair of these splendid plants at the entrance adds charm and distinction. On page 64 you will find attractive containers "just made for these plants"

Like sentinels in their native home, these Austrian Pines guard this old New England Homestead

Pinus Nigra

AUSTRIAN PINE

The Austrian Pine well pictured at the top of the page has a curious rugged aspect which makes a very artistic effect in any landscape scheme. It has an unusual spread of long branches, covered with dark green needle-foliage, stiff and resistant.

This is one of the Pines that will grow on poor, dry soil such as hilltops and sandy seaside places. It can endure the contact of sweeping wind and salt spray and it resists snow and ice pressure unusually well.

The needles or "leaves" and cones or "fruit" of the Pine family

THE PINES

THE Pines (*Pinus*) are the greatest glory of the evergreen region.

Little Tree Farms Pines are growing in fragrant beauty all over New England, out into the West and far down in the sunny South. Their wide-flung needle masses give a gracious serenity to the landscape picture.

Pinus Resinosa

RED PINE

The enduring qualities of Red Pine are very like those of Austrian Pine; it withstands the harshest New England winters; it grows on poor soils and near the salt spray.

Our Red Pines have never been better; so for quick results on your lawn, in the garden, or along the drive, plant our 7 to 8 ft. and 6 to 7 ft. sizes. For commercial plantings use the transplants and seedlings which are priced below.

"Stock Magnificent" Pittsburgh, Pa.

October 14, 1925.

"I have just received my order of thirty evergreens in splendid condition. Your stock is magnificent; the best I have ever seen of its kind. Thank you for promptness in shipment."

WHITE PINE

Pinus Strobus WHITE PINE

The White Pine is rightly called the "King of Pines." It is one of the few best commercial trees for New England; it is splendid as a lawn specimen; it makes an excellent hedge (see photograph page 15); it is planted in gardens, along paths and drives, as a screen.

Ever since the early youth of Little Tree Farms we have made White Pine the "first" specialty. We know how to select and start the seed, and we know how to grow and care for the "baby" seedlings in their journey to becoming full foliaged specimens as illustrated at the right.

Note: For prices of White Pine see next page.

A group of large White Pines growing at Little Tree Farms. Fine 10 to 12 foot specimens like the one below, only \$13 each

Offer A 50 Price \$20.00

Pinus Sylvestris

SCOTCH PINE

Scotch Pine shares the good reputation of Red Pine for use by the seaside or in exposure to driving winds. It is irregular in shape; its needles are very "glaucous" or blue green. A most artistic tree for the lawn. The Scotch Pine grows extremely fast and is very useful for reclaiming waste land. For this purpose we

strongly recommend the twice transplanted 12 to 18 inch plants in Offer A 53 at the right.

For quick results use our three times transplanted first grade 2 to 3 feet tall. A neighboring garage or other objectionable views can be very effectively and quickly screened by using the Scotch Pine.

Use Hemlock for planting on the shady side of the house

THE HEMLOCK

The Canada Hemlock (often called American Hemlock) is one of the most beautiful evergreens. The quality of its gently drooping foliage, dark green and rich of tone, makes it a wonderful evergreen for planting close to the house.

Its ability to thrive in partial shade makes it particularly useful for planting in shady places. It grows well on northerly slopes and exposed to cold, but should be protected from very high winds. Last but not least, its ability to stand shearing makes the Hemlock excellent hedge material. See Offer A 25 on page 14.

Prepare a circular bed by spading the soil; plant the taller evergreens in the center with the smaller evergreens around

Use the three times transplanted Little Tree Farms Hemlocks for ornamental groups; the twice transplanted and seedling stock for naturalistic plantings and extensive woods planting. If you have a strip of woods or a grove, try these small Hemlocks scattered here and there. The Hemlock is an "under-growth" tree.

You too can have a similar evergreen bed by ordering offer below

The Sugar Maples of Little Tree Farms go out to customers all over the country to decorate such noble lawns and drives. See the wonderful value in Offer 61

For Today and Tomorrow—Plant a Tree

SHADE AND FLOWERING TREES

Steadfast Friends of Man that Give Much in Beauty and Protection

THE MAPLES

THE Maples are known and beloved everywhere. They are of fine shape and stature, graceful in habit and full-leaved.

New England's rugged climate plus Little Tree Farms splendid soil and care have created for you Maples of supreme quality.

Acer Dasycarpum SILVER MAPLE

A hardy, quick service tree. It grows so fast that it has great value when early shade is desired. Silver Maple has a spreading crown and gets its name from the "silver lining" of the underside of the leaves. Plant Little Tree Farms trees for quick results.

Acer Platanoides NORWAY MAPLE

This very popular Maple has long been used both for street planting and for lawn shade. Its compact crown of close foliage

"Highly pleased"

August 5, 1925.

Williamstown, Mass.

The recent shipment which you made to me arrived in beautiful shape and Mrs. Doughty and I were very much impressed by the quality of the stock you sent us. Everything is now in the ground in its permanent position, and I am sure every one of the trees will do well.

What could be more restful than a Norway Maple like this one?

is very symmetrical. It is hardy in respect to smoke, dust and drouth; it is immune to most insects; it grows rapidly and steadily. Little Tree Farms 10 to 12 foot trees at only \$3.50 each are wonderful. They grow fast.

Acer Saccharum**SUGAR MAPLE**

The Sugar Maple is really an extremely handsome shade tree—one of the handsomest. And our Little Tree Farms Sugar Maples are certainly of the best. The prices we are quoting offer a great opportunity to plant the best for little money.

Its perfect health and resistance to disease; its noble proportions and powerful structure, with its delightful quality of shade (ample but not obstructive) make it first choice for fine streets and avenues. These qualities also fit it for the home-surroundings; and to this must be added its supremely handsome autumn color and lovely spring buds.

The peculiar quality which gives the Sugar Maple its name, is its ability to produce maple sap. Start a small maple sugar grove tomorrow! Plant one or more of the "Big Six" Grove of Sugar Maples, Offer A 61 at the right. For such high quality trees the value is there!

Those who want only a few shade trees for their lawn should order the splendid Offer below—(A 62)—four trees for \$9.00. There is the Silver Maple for almost immediate shade in a very short time; the Norway, Red and Sugar Maples for lasting effect. These four trees are carefully packed in moss and straw, tied with matting to protect the roots and tops.

Magnificent straight-stemmed Sugar Maples are grown at Little Tree Farms

"Very much pleased"

South Dartmouth, Mass.
May 9, 1925.

"The Sugar Maple trees reached me very promptly and in good condition. I am very much pleased and shall send another order soon as we can use them. We have built a new home and could only use the six just at present. I shall want shrubs and plants later."

Note: All trees in these offers are selected from the best of our nursery.

Fraxinus Americana

WHITE ASH

White Ash is a tree of much character and beauty, at all stages. Its trunk is particularly straight and smooth; its crown a magnificent oval. Its vigor and steady, rapid growth; its beauty and splendid shade value recommend it wherever you need a tall, clean-shaped tree in midsummer. These qualities make White Ash an exceptionally good street tree. And our low prices doubly recommend it for an ample planting. It is very long lived.

White Ash is much used for forest planting. This tree transforms a bare hill or field into a charming young forest.

Quercus Rubra**RED OAK**

The Red Oak is the one best all-round Oak,—beautiful, valuable, useful in all places. It grows and thrives everywhere for it is supremely healthy and vigorous by nature. Grows fast everywhere too.

Notice in the smaller picture at the top of the page the perfect symmetry of the Red Oak on the lawn. Its red is the purest, strongest red there is.

A grove planting of Red Oaks is an invaluable asset to any home grounds. The Red Oaks in the larger picture above show you just how such a grove would look on your lawn. For quick results plant our 12 to 14 foot plants at \$40.00 for 10; for a less immediate effect order Offer A 65 at the left.

In many localities whole streets and avenues are lined with this majestic Oak. It is very long lived, hardy and practically immune to tree diseases.

Because of the many exceptional qualities of Red Oak we have grown a large quantity of very fine trees. We can recommend them very strongly to anyone who wishes to plant a single lawn tree or a large number for naturalistic work.

Sweet Autumn Clematis "above" is a perfect mass of flowering fragrance

***Ampelopsis Quinquifolia*
VIRGINIA CREEPER**

The most brilliant of all in autumn. It is absolutely satisfactory in vigor, foliage and fruit. Delicate green all summer with heavy sprays of blue berries in fall. Use on walls or fences, with Clematis. See illustration of leaves below.

Grade	Each	10	100
† T 4-year	\$.50	\$3.50	\$30.00

Leaves of Virginia Creeper

***Ampelopsis Quinquifolia Engelmanni*
ENGELMANN CREEPER**

A charming vine of fairly rapid growth. Fine for verandas and arbors.

Grade	Each	10	100
† T 3-year	\$.50	\$3.50	\$30.00

***Ampelopsis Tricuspidata*
JAPANESE CREEPER**

The closest, smoothest cover for walls, the very best where a flat surface is needed. Known to many as Boston Ivy.

Grade	Each	10	100
2-year	\$.85	\$7.50	\$70.00

VINES

NOTHING takes the place of vines. They cover veranda, porch and arbor; they screen fences and decorate bare walls.

Below you will find the best for every purpose. All of Little Tree Farms high standard of quality—reasonably priced.

***Aristolochia Siphon*
DUTCHMAN'S PIPE**

A very handsome vine with large round leaves of very rapid growth. Excellent for shade. See picture below.

Grade	Each	10
† T 3-year	\$1.75	\$15.00

***Celastrus Scandens*
AMERICAN BITTERSWEET**

Bright red berries in autumn make its sprays ideal for winter home decoration.

Grade	Each	10	100
† T 4-year	\$.50	\$4.00	\$30.00

***Clematis Jackmani*
JACKMAN CLEMATIS**

Deep violet-flowers of rich velvety appearance. The showiest of all the Clematis.

Grade	Each	10
3-year	\$1.50	\$12.50

***Clematis Paniculata*
SWEET AUTUMN CLEMATIS**

A very graceful vine. Its many white flowers appear in the fall and are extremely sweet-scented. It grows thickly with glossy foliage. One of the best.

Grade	Each	10	100
† T 3-year	\$.50	\$4.00	\$30.00

***Clematis Virginiana*
VIRGINS BOWER**

One of the hardiest of the Clematis and one of the finest to use on walls and fences. See illustration upper left hand corner.

Grade	Each	10	100
† T 3-year	\$.50	\$4.00	\$30.00

ROSES

Hardy Climbing—Hybrid Perpetual Hybrid Tea—Rugosa—Wild

General Jacqueminot. Favorite "Jack" Rose. Brilliant scarlet crimson flowers. Blossoms full and globular.

Magna Charta. Large, fragrant pink flowers suffused with carmine. Prolific bloomer.

Margaret Dickson. White with pale flesh center. Well-formed flowers.

Mrs. John Laing. Large, soft clear pink flowers, very fragrant. Strong grower and free bloomer. Deservedly popular.

Paul Neyron. Largest flowers of any known rose. Clear pink shaded soft rose; very fragrant.

Prince Camille de Rohan. Deep velvety crimson or maroon. Unique color effect.

Soliel d'Or. Golden yellow, shaded nasturtium red. Free bloomer.

Ulrich Brunner. Brilliant cherry red, very vigorous and prolific bloomer. Fragrant large flowers.

HYBRID TEA ROSES. "Everblooming".

Very wonderful colors, sizes and forms have been created through hybridizing. They can be easily protected through the winter. Strong field-grown 2-year plants.

\$1.10 each; \$10.00 per 10.

Betty. Coppery rose shading to yellow, extra large blooms full and fragrant.

Columbia. Beautiful pink which deepens as blooms mature. Free flowering all season.

Francis Scott Key. Rich crimson red, sturdy bloomer both spring and fall. Immense blooms with petals arranged regularly.

General McArthur. Large, full, well-shaped flowers. Velvety scarlet shading to bright crimson. Blooms abundantly. Very popular.

George C. Waud. Glowing orange vermillion flowers. Holds color well. Flowers freely.

Gruss an Teplitz. Beautiful clear crimson-scarlet flowers from June till frost. Very dependable.

Killarney. Lovely long pointed buds opening into large, loose blooms of flesh pink tinted white. Exquisite perfume.

Killarney White. Sport of Killarney. Pure White. Vigorous grower.

Los Angeles. Flame-pink flowers, toned with coral and shaded yellow at base of petals. Vigorous and free bloomer. Exceedingly fragrant. A prize rose.

Mme. Edouard Herriot. Coral-red buds. Flowers shaded yellow to scarlet. Glossy bright foliage.

Mme. Leon Pain. Unusually large, full flowers. Salmon shaded to orange. Particularly good fall bloomer.

Mrs. Aaron Ward. Deep Indian yellow. Beautifully shaded. Blooms early and late. Long shapely buds. Very fine.

Ophelia. Large, full, perfect blooms. Light salmon flesh shading to yellow. Vigorous and reliable.

Red Radiance. Lovely deep radiant red globular flowers. Very fragrant. Blooms until frost.

Sunburst. Long, lovely buds opening to full large flowers of beautiful sulphur yellow. Strong plant with few thorns.

RUGOSA ROSES. These Roses bear rose flowers but resemble shrubs in their growth. Heavy stems with abundance of dark green, heavy, crinkly foliage. Exceptionally hardy and vigorous. Strong three-year field grown plants from 18 to 30 inches tall.

\$5.75 each, \$6.50 per 10, \$60.00 per 100 (except as noted)

Rosa Rugosa. Single red flowers. Handsome where natural effect is desired. Thick foliage. Makes a wonderful hedge. Produces large red seed pods forming a striking contrast with dark green foliage. Excellent seashore plant.

Rosa Rugosa Alba. Same as above except that flowers are white.

Conrad F. Meyer. A hybrid Rugosa with exceptionally fine qualities. Fast grower. Large, double, fragrant flowers of bright, silvery rose. \$1.25 each, \$10.00 per 10.

WILD ROSES. Very desirable shrubs for naturalistic planting. They are vigorous growers requiring little care. Single flowers. Strong field grown 2 to 3-foot plants.

\$8.75 each, \$6.00 per 10, \$40.00 per 100.

Rosa Blanda. Pink flowers 2 to 2½ inches across. May-June. Slender stems.

Rosa Rubiginosa or Sweetbrier Rose. Pink flowers in small clusters. Dense shrub 6 feet high. Famous for fragrance.

Rosa Setigera or "Prairie Rose." Shrub or vine; native of Eastern America. Profuse clusters, deep rose.

Rosa Wichuriana. Trailing. Abundant white flowers. Glossy foliage.

Hardy Climbing Rose

Hybrid Rose

ROSES, Rosa. We are not offering a long list of varieties; rather, a selection of roses of especial merit in respect to hardiness and habit, and covering a good variation in color.

HARDY CLIMBING ROSES. The "pick" of all the "climbers". The varieties listed below are hardy, two-year field grown plants, except where noted.

Dr. W. Van Fleet. Large bluish-pink flowers, deep glossy foliage.....	Each	10
Dorothy Perkins. 4-year.....	\$8.55	\$7.50
2-year.....	1.25	11.00
Clear shell-pink double blooms.....	.85	7.50
Dorothy Perkins. White double flowers. A very fine white climber.....	.85	7.50
Excelsa. Large, brilliant crimson clusters.....	.85	7.50
Paul's Scarlet Climber. Free-flowering, vivid scarlet semi-double flowers.....	1.00	9.00
Silver Moon. Pure white, semi-double bloom with yellow stamens. Rich bronze-green foliage.....	1.00	9.00
Tausendschön. On opening the flowers are bright cherry-pink, changing later to lighter tints. Almost thornless.....	.85	7.50
Yellow Rambler. Yellow blooms. A favorite yellow climber.....	1.00	9.00

HYBRID PERPETUAL ROSES. Hardy roses that bloom profusely in June. The flowers are larger, sweeter and more abundant than those of any other class. Hardy two-year field grown plants.

\$1.00 each, \$9.00 per 10.

Clio. Satiny flesh color with a rich rose center.

Frau Karl Druschki. Pure white flowers. Free bloomer and vigorous. Fine stems. Very popular.

Special Offer A 68. One each (40 plants) of all the roses listed above, \$36.00. Value, \$39.00

* "B & B" (Balled and Burlapped) means roots in a ball of native loam wrapped and tied in burlap.

HARDY PERENNIALS

HOW could we make a garden without them! Such variety of leaf and blossom, such glory of color and fragrance, first to greet us in the spring, last to yield to winter's snows. Here indeed beats the steadfast heart of the garden!

The varieties offered below give you a wide choice of popular and dependable perennials. The plants themselves are large, strong-rooted and ready to grow.

IRIS - PEONIES - PHLOX - GLADIOLI - DAHLIAS

GERMAN IRIS. Really a rival of the orchid in colors. All colors from white to dark purple. Plant in a well drained soil, sunny location, rhizomes (roots) just covered with soil. ("S" represents upper petals, "F" lower petals.)

	Each	10
Alcazar. S, light violet. F, deep purple bronze	\$1.00	\$9.00
Aureau. Deep golden yellow, large flowers	.50	4.00
Caprice. Reddish purple	.50	4.00
Florentina. White, slightly tinged lavender	.50	4.00
Her Majesty. S, rosy pink F, pink winged crimson	.50	4.00
Iris King. S, yellow. F, dark brown; border of golden yellow	.75	6.50
Kochi. S and F, deep claret purple	.50	4.00
Lohengrin. S and F, deep violet mauve	.50	4.00
Monsieur. S, violet. F, purple crimson	.50	4.00
Pauline. S, lavender. F, slightly darker	.75	6.50
Rebecca. A good yellow variety	.50	4.00
Rheln Nise. S, pure white. F, deep violet blue, with white edge	.75	6.50

JAPANESE IRIS. Large flowers with beautiful colors.

Blue Danube. Pure, rich blue velvety center. 6 petals	\$ 75	\$6.50
Gold Boud. Large, pure white, yellow center. 6 petals	.75	6.50

PEONIES PAEONIA are easily grown and very hardy. Plant in a moist, deep rich soil, in sunlight. 2 to 3 inches deep. Strong 3-5 eye divisions.

	Each	10
Duchesse De Nemours. Early. Pure white, sulphur color	\$1.00	\$7.50
Festiva Maxima. Early. Creamy white; crimson spots in center	1.00	7.50
Alexandra Dumas. Midseason. Violet-rose; creamy white collar	1.00	7.50
Baroness Schroeder. Midseason. White. Large; fragrant	2.00	15.00
Boule De Neige. Midseason. Large. White. Flecked crimson.	1.00	7.50
Felix Crousse. Midseason. Brilliant red; large, fragrant	1.00	7.50
Germaine Bigot. Midseason. Pale rose; center flecked red	2.00	15.00
La Sublime. Midseason. Dark crimson. Strong grower	1.00	7.50
Mme. Bouquet. Midseason. Velvety crimson; center carmine	1.00	7.50
Alvanche. Late. Compact white. Center tinted lilac	1.50	12.50
Couronne D'Or. Late. White with yellow stamens, center red	1.00	7.50
Livingston. Late. Pale lilac; silver tips, flecked carmine	1.50	12.50

HARDY PHLOX. Our selection gives all the desired contrasts in size, color, and time of bloom. Strong field-grown plants.

	Each	10
Antonin Mercle. Very large pure white center, lilac bordered	.35	\$3.00
B. Comte. Rich rusty amaranth	.35	3.00
Baron von Dedem. Large trusses, blood red	.35	3.00
Beacon. Brilliant cherry red. Very effective	.35	3.00
Coequelicot. Brilliant orange scarlet	.40	3.50
Elizabeth Campbell. Bright salmon pink dark red eye	.40	3.50
Etna. Orange red, large flowers on branching stems	.35	3.00
Independence. Pure white, late flowering	.35	3.00
Jules Sandeau. Clear pink, large free flowering	.40	3.50
Miss Lingard. Early white with pink centers	.35	3.00
Richard Wallace. Pure white, violet-rose center	.35	3.00
Victor. Bright carmine rose, large flowers	.35	3.00
W. C. Egan. Delicate lilac with bright salmon eye-large	.35	3.00

DWARF PHLOX is indispensable in the rock garden; in naturalistic plantings; on banks; and for edging. Strong field-grown plants.

	Each	10
Amoena. Bright pink flower. Dense head. April and May	\$0.30	\$2.50
Subulata. Moss pink flowers in profusion. The most popular.	.30	2.50
Subulata alba. Flowers large, white. May and June	.30	2.50
Subulata lilacia. Similar to Subulata	.30	2.50
Stellaria. Lovely pale blue flowers. April and May	.30	2.50

GLADIOLI. The stately spikes of rare color blendings make

Gladioli a much loved flower in the gardens of today. Plant bulbs 5 to 6 inches deep and from 3 to 4 inches apart. For a succession of blooms, plant at intervals of 10 days from May first to June 15th.

Alice Triplady. Orange saffron flowers. Large. Strong	\$1.50	\$12.50
America. Delicate lavender pink. Very large. One of most popular	.50	3.50
Dorothy Wheeler. Shrimp pink, suffused with geranium pink. Yellow throat	1.75	12.50
Early Snowflake. White, flaked and tinted rose. Yellow throat	2.00	15.00
Evelyn Kirtland. Rosy pink. Throat blotched scarlet red. Strong	1.50	12.50
Flora. Beautiful golden yellow. Touch of deep red in throat	1.50	12.50
Gretchen Zang. Beautiful melting shade of pink; blending scarlet.	1.00	8.00
Halley. Delicate salmon pink. Creamy blotch. Early bloomer.	.60	4.00
Herada. Pure glaucous mauve; deeper markings in throat. Immense	1.50	10.00
Kunderd Glory. Creamy apricot with pink tints. Crimson stripe. Ruffled	1.50	12.50
Le Marechal Foch. Light pink. Extra large flowers. Early	1.00	7.50
L'Immaculee. Pure white. Medium sized flowers	1.50	12.50
Lily White. Snow white. Lower petals center shaded. Very early.	1.00	8.00
Miss Helen Franklin. Pure white, violet markings on lower petals. Ruffled	1.00	8.00
Mrs. D. Norton. Silvery white tinted pink. A prize winner	2.00	15.00
Mrs. Francis King. Flaming scarlet. Food for brilliant effects.	.60	4.00
Mrs. Frank Pendleton. Flashed salmon pink. Throat blotched carmine	1.00	8.00
Mrs. Watt. American Beauty Red. Rich blue-green foliage	1.00	7.50
Myrtle. Shell pink. Penciled with rose. Early. Fine straight spike	1.50	12.50
Orange Glory. Rich orange with exquisite lighter throat. Ruffled.	2.00	15.00
1910 Rose. Pure rose pink. Narrow white lines through center of petals	1.00	9.00
Schwaben. Pure canary yellow, shading darker patches in center	.90	7.00
War. Deep blood red. Very tall and conspicuous	1.75	12.50
Wilbrink. Lovely flesh pink. Creamy blotch on lower petals.	.70	7.00
Yellow Hammer. Pure creamy yellow. Tiny red markings in throat	1.00	8.00

DAHLIAS. Never has the dahlia been more popular. The list below contains some of the best varieties. Each tuber is of high quality and should produce flowers the first season.

	Each	Dozen

The two sprayers listed below are of the very best material and workmanship.

Auto Spray 26 (right)

For spraying any kind of insecticide. Made of finest brass; durable. \$1.50.

Postpaid. Use for small garden work.

Auto Spray Pump No. 1 (left)

Automatic Spray for trees, vines and vegetables. Finest brass and best of workmanship throughout. Price \$10. Express Collect. Use for larger work.

Lawn Mist Sectional Sprinkler (above)
For flower beds and lawns. Very efficient. Price per 15 foot section \$12.50. Express Collect.

Cyclone Revolving Sprinkler (above)

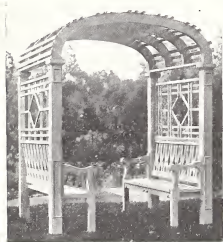

12 inches high. Will cover an area of about 30 feet in diameter. Price \$5.00. Express Collect.

Gazing Globe (right)

One of the finest ornaments for garden or lawn. 14 inches in diameter \$14.00. Cement stand \$4.00 extra. Express Collect.

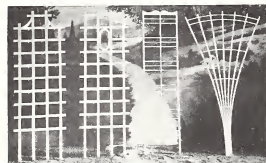

GARDEN TOOLS AND ACCESSORIES (Continued)

Arbor No. 401 With double seats

6 ft. wide 5 ft. long \$112.00
6 ft. wide 5 ft. long 125.00
One of our most attractive and popular designs. Backs and seats slope. Shipped Express Collect.

Lattice and Fan Trellises For Vines and Roses.

No. 421 No. 424 No. 418 No. 419
6 ft. \$2.50 8 ft. \$3.00 6 ft. \$2.75 8 ft. \$3.25
7 ft. 2.75 10 ft. 3.50 7 ft. 3.00 10 ft. 3.75
Made extra strong; painted green. Express Collect.

Lattice Fence No. 429. Such a fence can be used in the garden or for the service yard. Made in panels 5 ft. high, 8 ft. long. Price per running foot, posts included, \$2.60. Express Collect.

Lawn Bench No. 545

4 ft. \$10.00
3 ft. 9.00

Express Collect. This pretty and durable bench for the garden is well made, of strong wood, and is painted white. Other styles and sizes available. Write for prices.

Garden Seat No. 403

4 feet high
4 feet long
\$20.00 Express Collect. This comfortable and very attractive high-backed garden seat is of durable wood, well built and painted white. It is protective and artistic. Other styles and sizes available. Write for prices.

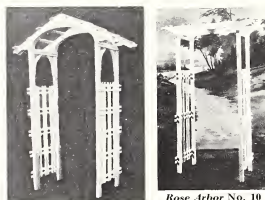

Round Plant Tub
Well made of White Pine.
6 in. dia. \$6.5
8 in. dia. .80
10 in. dia. 1.00
12 in. dia. 1.50
14 in. dia. 2.00
Express Collect.

Square Plant Box

Made of well seasoned White Pine in a workmanlike manner, and painted green; 16 inches square. For evergreens or flowering plants, on porch or steps. \$4.00 each. Express Collect.

Rose Arch No. 536
3 feet wide 2 feet deep
\$24.00 Express Collect.
Each is well built and painted white.

Lattice Fence—No. 430

Comes in 8 ft. sections. Posts included. Express Collect. 4 ft. high \$2.25 per running ft. 5 ft. high \$2.50 per running ft. 6 ft. high \$2.75 per running ft. Arbor—4 ft. wide, 2 ft. deep, 7 ft. high \$25.00. Complete with gate and double acting hinges, \$37.50.

Garden Seat—No. 600
2 ft. wide \$10.00
5 ft. wide 13.50
5 ft. wide 16.00

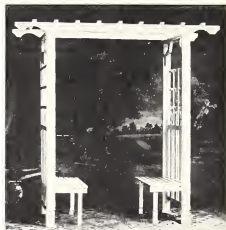

Made of wood; painted white. Express Collect.

Hose Rack

Prolongs the life of hose. Every house owner should have one. \$3.50 each. Express Collect.

Window Box

A strong, well made, serviceable wooden box finished with two coats of dark green paint. 3 ft. long, 7 in. wide, 7 in. deep. \$1.25 each. Express Collect.

Pergola Arbor No. 801. With folding seats. 5 feet wide, 7 feet high, 3 feet deep \$45.00. With oval top similar to No. 401 left \$47.50. Furnished with lattice and seat in rear, \$50.00. Rose Arbor, same design, 4 ft. by 2 ft., \$20.00. Fence to match in 8-ft. sections posts included.

Express \$4 feet high \$2.00 per running foot. Express 4 feet high \$2.25 per running foot. collect.

Artificial Stone Pedestal for Sundial or Gazing Globe. 39 inches high. Very strong and durable. \$22.00 Ex. Collect.

Concrete Bird Bath
3 ft. high; diameter 16 inches. Well balanced. \$22.00 Express Collect.

Garden Bench of Artificial Stone
4 feet long, 1 1/2 feet high, 1 foot wide. Heavy; gray, granite flecks. Price \$25.00 each. Express Collect.

Terra Cotta Pot No. 600
13 in. high, 9 in. base, 13 in. dia. \$8.00 each.
16 in. high, 12 in. base, 23 in. dia. \$16.00 each.
18 in. high, 15 in. base, 28 in. dia. \$32.00. Frrt. Collect

Terra Cotta Pot, No. 49
9 1/2 in. high, 6 in. base, 13 in. dia. \$2.50 each.
11 in. high, 9 in. base, 17 in. dia. \$6.00 each.
15 in. high, 12 in. base, 24 in. dia. \$14.00 each.

Artificial Stone Vase

15 inches in diameter; 18 inches high; heavy; gray, granite flecks \$9.00 each. Other styles and sizes available. Write for prices. Freight Collect.

All orders are subject to loss of stock by drought, floods, fire, or other unavoidable causes.

(OVER)

Visit Little Tree Farms at Framingham Centre, Mass.

(See Map Below)

THERE is always something of interest to see at our Show Grounds and Office Building, on Pleasant Street. In fair weather interested groups are studying the demonstration plantings at all hours of the day, selecting from them with the help of our landscape men materials and arrangements for their own grounds. In inclement weather the big white and green Home Office offers its hospitality. Photographs and colored plates of plants and plantings substitute for the demonstration grounds. A sun-room full of sample plants and a room devoted to garden tools and accessories make your decisions easier. Your car is safe in our ample parking spaces. You are always welcome.

Shipping Seasons. Our improved methods allow safe shipping practically the year round, midwinter's cold marking the only pauses. Especially for customers within easy trucking distance there need be no hesitation in ordering at any time save deep winter.

The usual nursery shipping seasons are: In Fall, about the middle of August for evergreens, continuing through November. The first of October for hardwoods and shrubs continuing until the ground freezes. Evergreens for pots, tubs, veranda boxes, etc., are shipped until Christmas.

In Spring. As soon as the frost leaves the ground (usually about the middle of March), continuing until June, for Evergreens, Deciduous Trees and Shrubs, Vines, and Perennials. Roses, Dahlia tubers, Gladioli bulbs, etc., shipped March until May.

Planting time is determined not by the state of vegetation where the planting is to be done, but by the condition of the stock to be planted. So long as the plants are dormant, or in movable conditions they may safely be transplanted. We can ship to southern localities much later than would be supposed, because vegetation in Massachusetts is dormant much later.

At Little Tree Farms you will find a well-stocked show ground from which to select what you want. Also a pleasant landscape office where you may discuss your needs with a landscape man, and secure advice or plans. Every equipment for the convenience of customers.

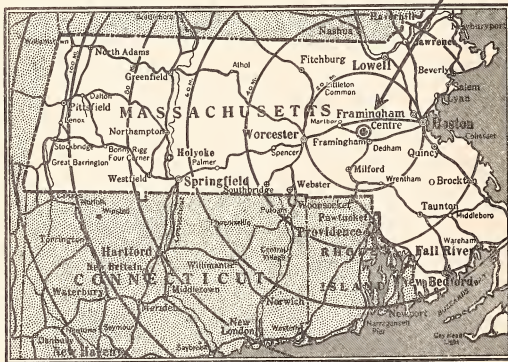

Follow "LITTLE TREE" signs to reach the nursery on Pleasant Street, Framingham Centre.

To Reach Little Tree Farms

By Motor. Those visiting Little Tree Farms by motor, use main highways as indicated on the map given at the right. Finest State Roads in all directions.

By Electric. At Park Square, Boston, take car marked "Worcester" leave car at Framingham Centre. A short walk out Pleasant Street brings you to Little Tree Farms.

By Train. Leave the train at Framingham Station and take motor bus to Framingham Centre—or taxi from Framingham to nursery.

Little Tree Farms Stock is

Dug fresh upon Order:

No stock kept in storage cellars.

Graded carefully and generously, usually giving extra for good measure. To avoid confusion, please order sizes as given in the catalog.

Packed properly in the moist air of modern packing cellars, according to species, time of year, and distance to travel.

Delivered promptly to transportation companies.

All Shipments are marked "RUSH" that you may receive your order as quickly as possible.

Special Information (Please Read)

Little Tree Farms is the trade name of the wholesale and retail nurseries of the American Forestry Company. The Sales, Landscape and General Offices are at the retail nursery, Little Tree Farms, No. 2, on Pleasant Street, Framingham Centre, Mass., twenty-two miles west of Boston, and twenty miles east of Worcester on a State Road from Boston to Worcester and on the Boston and Worcester electric. Framingham Centre is two miles north of Framingham, which is on the Boston and Albany and the New York, New Haven and Hartford Railroads.

When you Order Please Remember:

The more times a plant has been transplanted, root pruned, and longer cultivated in the nursery, the more vigorous and rapid growing it becomes, and the better adapted to difficult conditions. The more difficult the condition, or the quicker the result desired, the better is the grade you will need.

Deliveries. Express shipments normally arrive promptly and in good condition. For carload quantities and heavy shipments, however, Freight Shipment is best, unless the distance permits shipment by Motor Truck which is most strongly recommended. We ship by motor truck 150 miles, occasionally further. Prices for truck delivery given upon application.

We deliver free to transportation companies and our responsibility ceases upon such delivery. Shipments travel at customer's risk. We do not pay transportation charges.

There is no extra charge for packing retail orders, except when specifically noted. In comparing prices with other growers, please note this, as a considerable amount in this saved our customers.

Nursery Stock marked "B & B" is shipped with

To order early for prompt shipment. This is important for successful planting.

That shipping instructions should be written very plainly.

roots in a ball of earth securely tied in a burlap, at no additional charge.

Lower Rates on Quantity Orders. We sell 500 or more trees of the same size and kind at the hundred rate; between 50 and 500 at the hundred rate; less than 50 at the ten rate; less than 5 at the "each" rate.

Our Terms are Cash with Order. Post Office and Express Money Orders should be made on Framingham. Send cash in registered mail only. Charge accounts can be opened only if satisfactory references are furnished. C. O. D. orders must be accompanied by one-half cash.

Inspection Certificates of the United States, Department of Agriculture and the State of Massachusetts Agricultural Department accompany each shipment and assure healthy, clean stock.

Little Tree Farms Warranty. We warrant our stock true to label, properly packed, and in all respects fully up to Little Tree Farms standard of quality. We guarantee that, should the wrong species or grade or quantity be shipped through error, corrections will be made upon proof and notification within ten days from receipt of goods. We assume no liability for damages beyond the amount of the purchase price. It is humanly impossible to guarantee the growth or life of trees, shrubs or plants, since causes beyond our control may injure or kill them.

We make no Warranty or Guarantee as to Replacements.

In cases where, for the accommodation of the customer, we furnish labor or services in laying out grounds or in planting stock, we make every endeavor to furnish experienced, competent men. We make no further guarantee or warranty in this respect. None of our salesmen or other agents are authorized, in any manner, to waive or alter the above conditions.

Orders are accepted only on the above basis. Claims for delay or injury in transit should be taken up immediately with the transportation company. Write us at once for advice so that we may help you secure settlement.

How To Plant

Read carefully and save your money, effort and time. If you carry out these instructions your plants should grow and be a source of lasting pleasure.

PLANTING is a very simple operation, but the way you carry out the fundamentals means success or failure. Remember that all plants are living organisms. They need air, food and water. They receive their food and strength from the ground through their roots—the most delicate part of the plants. Be sure the roots are not damaged, or your plant is as good as dead before you start. Drying out of the roots is the thing to avoid. Little Tree Farms digs a ball of earth with its larger evergreens to prevent drying out. The roots on smaller plants are much easier to protect; they are safely shipped with their roots in wet packing material.

Little Tree Farms stock is properly packed for shipment by the most approved methods gained by many years of experience. Stock leaves us freshly dug and properly packed. Your plants should reach you in excellent condition.

After you have received good nursery stock there are three very important things that must be done to make your planting a success:

1. Proper soil preparation. 2. Correct placing of plants in the soil. 3. After care: Pruning, mulching, fertilizing, watering, etc.

These three points will be discussed for various types of plants in the instructions below.

EVERGREENS

Soil preparation. Evergreens as a whole prefer a sandy loam rich in humus (decayed vegetable matter) and porous enough to permit good drainage. Clay or heavy soils should be lightened by mixing in sand and well rotted manure containing a good deal of straw. Extremely sandy soils may be improved by adding some clay or heavy loam and well rotted manure. Wherever it is possible, prepare the soil, but if this can't be done, select the plant that will grow best under your conditions. (See lists on page 26, Year Book 36.)

If the plants are to be arranged in groups, as they often are around the foundation of a house, and the soil is fairly good, it is well to prepare the entire area to be planted. This is done by digging to a depth of 18 inches and thoroughly turning over the soil, removing roots, stones, and other objectionable matter. Very frequently we find that contractors use rubbish of all kinds for filling around the foundations of new houses. This rubbish, and especially plaster, is harmful to the plants and must be removed. If a soil is poor it is a wise investment to remove it and have good soil hauled in. Your plants will then have not only a much better chance to live, but will

trench, in which place the ball of earth with burlap and cover over with several inches of soil to exclude the air (figure 2). Soak the trench thoroughly afterward. Plants can be held a week or more this way if placed where it is cool and away from sun and drying winds. If the plants are bare rooted, dip the roots in a thick paste of mud and water (figure 3) and plant temporarily (called heeling-in) by plac-

Covering roots with soil, Figure 2

ing them closely together at an angle, their roots in a trench, and cover these with soil to exclude the air. Water thoroughly.

To plant "B & B" evergreens, dig a hole 2 or 3 times the size of the ball of earth. Refill the hole with good loam until it is just large enough to take the ball. Place the burlapped ball in the hole, cut the strings and carefully remove the burlap (figure 4) preserving the ball. Shovel in some good loam and pack firmly around the ball with a tamper, or your foot, as in (figure 5). Do this several times, until the hole is two-thirds full. Then fill the hole with water, allowing it to settle. Refill several times (figure 6). Now fill the hole with soil, leaving it saucer-shaped so that the water will collect around the plant and not run away.

Bare rooted plants are planted the same as above, except that the roots are to be spread out and downwards as much as possible.

After Care. Water the ground thoroughly so that the water reaches the bottom roots. Merely sprinkling the foliage or soil is worse than no water at all. Thorough watering twice a week is usually sufficient, but this depends on weather and other conditions. After watering stir the soil to a depth of one inch as this preserves the moisture.

In late fall it is well to cover the ground around the plants with a mulch of two or three inches of well rotted stable manure. Sheep manure may be used at the rate of one pound for each five square feet. The manure should be allowed to remain over the winter.

Where it is desired to keep plants small it is necessary to "root prune." This is done by pushing a spade its entire depth into the soil in a circle around the plant. The size of this circle should be determined by the spread of the branches. The finer foliated plants should be sheared and the coarser foliated plants, such as Pines and Spruces, pruned with a knife. This root pruning with the shearing makes it possible to keep plants low and compact for a long time. The best time to shear or prune is in June, but it may be done at any time.

SHADE AND FLOWERING TREES AND SHRUBS

Soil preparation. Same as for Evergreens.

Unpack promptly, and if not possible to plant immediately, "heel in" by placing the trees closely together, roots in a trench, and covering over the roots to exclude the air. See figure 2. This "heeling in" should be done in a cool place out of sun and drying winds. Water, if dry.

Planting. Dig a hole 2 or 3 times the size of the spread of the roots and refill with several inches of loose soil, making a cone-shape mound, so that when the tree or shrub is put on top of it, the roots will have a

Dipping roots in mud, Figure 3

tendency to run down the side. Then cover the roots with several inches of soil, packing firmly with a tamper, or foot, as in figure 3. Fill hole two-thirds full. Fill hole several times with water, letting it settle each time. Now fill the remaining cavity with soil so that the hole is somewhat saucer shaped; water will have the tendency to collect around the plant and not run away.

If trees are large and are likely to move in wind, they should be braced with guy wires or supported by driving in a stout stake alongside of the stem, and the two tied with old hose or leather strap to prevent chafing. The tops of deciduous trees and shrubs should be pruned after planting. This means cutting out

Watering the roots, Figure 1

have food for years to come. A healthy plant is a joy, but a sickly plant is worse than none.

If it is difficult for you to get well rotted stable manure, sheep manure, which we can supply at reasonable prices, is a good substitute. Use about one-half pound of sheep manure for each square foot. Never use fresh manure, lime or chemical fertilizer.

Little Tree Farms quality evergreens are usually shipped "B & B" (roots in ball of burlap-tied earth).

Unpack promptly upon arrival. If balls of earth appear somewhat dry, stand the plants close together and water until balls have become thoroughly wet (figure 1). If planting cannot be done within a few hours, dig a

interfering branches and about one-third of the previous year's growth.

FOREST PLANTING

In planting large quantities of young trees, it is impractical to prepare the soil or to water them afterwards. One must depend on planting in moist soils at a suitable season and on the vigor of the plant and suitability to conditions. Little Tree Farms plants have great vitality and splendid roots and such are most sure to take care of themselves after proper planting.

ROSES

Soil preparation for roses is a very important and necessary factor in their success. Prepare the bed by digging to a depth of 18 inches. If the soil is good just work into it about one-third its bulk of well rotted manure (cow manure is preferred though horse manure is nearly as good). Have soil and manure thoroughly mixed. Roses prefer a heavy soil, though a light one will suffice if properly enriched each spring.

Roses require much moisture but will not stand "wet feet," or standing water. If water does not drain through the soil readily, some means of drainage is necessary.

Unpack promptly. Upon arrival take the rose plants out of the boxes and "heel in," placing the plants closely together in a slanting position in a trench and cover over roots well with soil to exclude air. Water thoroughly. Take out but a few plants at a time.

When planting, be sure the roots do not become dry. Be sure that the roots are well spread out and the soil is firmly packed around each plant to exclude the air. Plant about two inches deeper than "the crown." (This is where the first branches rise.) This is very important. Water thoroughly.

Plant Hybrid Perpetuals, 2½ to 3 feet apart; Hybrid Teas, 1½ to 2 feet apart; Ramblers, 5 to 6 feet; Rugosa Roses for hedge, 1½ feet; Wild roses, 2 feet apart.

After care. During the growing season keep a good mulch by stirring the top soil to a depth of an inch or so, and in dry weather water so that the bottom roots are reached.

Removing the burlap, Figure 4

If plants become infected with lice or aphids, spray with *Black Leaf Forty*; if attacked by the rose bug, use *Melrose*. See page 63. Instructions for use come with each package.

Protect Hybrid Perpetuals and Hybrid Teas during the winter by heaping up soil around them so that 6 to 8 inches of the stems are buried.

Topsoils should be pruned back so that only 3 to 4 strong branches remain and only 4 to 6 "eyes" on each branch.

PERENNIALS

Soil preparation. Select a rich somewhat moist soil, in good light. Prepare the bed by digging to a depth of 18 inches, working in a liberal quantity of well rotted manure. Arrange the plants according to their heights

and color combinations. Plant enough kinds to provide continuous bloom from spring to fall. Avoid too striking color contrasts. Do not, as a rule, set plants singly, but rather five or more of a kind together. A much richer effect is gained this way and a longer season of bloom.

Planting. The average distance between plants is usually about a foot. The plants which grow three feet or more are put further apart and the very low growing plants closer together. Spring and fall are good planting seasons. April and May, September and October are the best months.

After Care. Keep plants well mulched and watered during the summer. In the winter it

Stamping the plant, Figure 5

is well to cover the beds with about two inches of coarse straw. This is put on after the ground has frozen and prevents the alternate freezing and thawing which is detrimental to the plants. Fertilize the beds each spring by working well rotted manure or sheep manure into the surface soil.

PEONIES

Soil Preparation. To secure the best and biggest blooms from your Peonies the soil should be well prepared in advance of planting. Any good soil will do if the bed is dug to a depth of 18 inches and five or six inches of well rotted cow manure put on the bottom. This manure should be covered with four inches of soil to prevent direct contact of the manure and roots. Mix about 10 per cent of well rotted manure or leaf mould with the rest of the soil and plant the Peonies.

Planting. Peonies are best planted in early spring or during September and October.

Plant the "roots" about three inches under the surface and 2 to 3 feet apart. This gives them room to develop. Peonies are extremely hardy and need no protection after the first winter.

After Care. When the ground becomes workable in the spring dig the soil around the plants to a depth of an inch or two and work in some well rotted manure or bone meal taking care to keep the fertilizer away from the crown. Peonies like a lot of moisture and after the buds have formed an application of liquid manure once a week will produce larger and more brilliant blossoms. To get large flowers, pick off the lateral buds and thus throw the strength into the top buds.

DAHLIAS

Soil Preparation. Dahlias like a porous soil with plenty of food material in it. Sunny or partially shaded locations are best. No matter what the soil is plants are benefited if the soil is dug to the depth of a foot or more and well rotted cow or horse manure worked in. Be sure the soil and manure are well mixed.

Planting. When planting dig a hole six inches deep place the tuber flat (eye facing

upward) and cover with 1 inch or so of soil mixed with two handfuls of fertilizer. A mixture composed of good chemical potato fertilizer and ground bone meal in equal portions is best. Be sure no chemical fertilizer, or manure comes in direct contact with the tubers as this may burn them. After the plant is up about three feet hoe into the soil a handful of fertilizer every three weeks.

Dahlias should not be planted until all danger of frost is over.

After Care. Frequent cultivation is essential until the plants flower. Cultivation should then be stopped for at this time there is danger of cutting the new roots. When the first shoots of the Dahlias appear above ground there is some danger from cut-worms. An application of arsenate of lead is effective. (Directions for use are found on package.) Prices on page 63.

Plants should be staked to prevent tender stems from breaking. Place stakes when tuber is planted. To produce very large flowers it is necessary to disbud the plant. This is done by removing some or all of the buds except the terminal one. If the plant seems over-foliated some of the foliage may be removed with a sharp knife.

Dahlias need a generous supply of water. Soak the ground thoroughly once a week and then mulch.

After the stems and leaves have burned brown, as they do when the first frost comes, it is time to dig the tubers for storage. Dig as you would potatoes, but be careful that you do not break them apart. Cut off the stems three inches above the tubers and then place the tubers in the sun for an hour or two. Tubers should then be packed up-side-down in boxes so that excess moisture may drain out of the hollow stem. Keep in a cool frost proof place.

A temperature of about 45 degrees is good.

Do not divide your tubers until spring. Then with a sharp knife remove each tuber by cutting it from the old stalk leaving that part of the stalk which has an eye or sprout connected with the tuber. The new plant starts its growth at this eye so a tuber without an eye is worthless.

Watering after planting, Figure 6

GLADIOLI

Soil Preparation. "Glads," like most plants respond best to a good loam soil with plenty of nourishment. You will be amply repaid in blossoms if you feed your plants.

Planting. Plant bulbs four inches deep in heavy soil and five to six inches deep in lighter soils. Thoroughly pulverize the soil working in well rotted stable manure. A little fertilizer or bone meal is also helpful.

To secure a succession of bloom plant a new lot of bulbs every ten days from the middle of April till the end of June.

After Care. In fall when stems have turned brown dig and store away in a cool place for six weeks. At this time tops should be cut off and the bulbs stored in a cool place, away from frost and drying heat, until spring.

LITTLE TREE FARMS
and
"THE SQUARE DEAL"

Little Tree Farms is not a philanthropic institution. It believes in an honest profit on an honest service. But for every dollar it receives, this organization from top to bottom and from center to circumference is pledged to give a full measure of value, heaped up and running over.

Little Tree Farms wants your business, but it also wants the business of your children and your children's children. This fact—more than any written bond or contract—is your guarantee of a "Square Deal."

President.
